

Khaled Sabry

Senior Frontend Engineer Angular • React • TypeScript • Frontend Architecture • Design Systems

isabryex@gmail.com | 01030341872 | Cairo, Egypt | linkedin.com/in/khaled-sabry-680649139 | github.com/ksabry97

SUMMARY

Senior Frontend Engineer with 3+ years of experience designing and building scalable enterprise web applications using Angular, React, and TypeScript. Proven track record of delivering applications from the ground up, architecting reusable component libraries, and developing maintainable frontend solutions for fintech and enterprise platforms.

Experienced in frontend architecture, design systems, state management, real-time applications, secure authentication and authorization, and API integrations. Passionate about building high-quality, performant user experiences, improving developer productivity through reusable solutions, and collaborating across cross-functional teams to deliver business impact.

PROFESSIONAL EXPERIENCE

Senior Frontend Engineer

07/2025 – Present

Paysky

Key Achievements

- Designed and maintained a shared Angular UI component library using standalone components to standardize UI development across enterprise applications.
- Built reusable, configurable UI components that reduced duplication and improved development consistency.
- Established frontend development patterns and component documentation to improve maintainability and accelerate feature delivery.
- Collaborated with cross-functional teams to integrate shared components into multiple products while maintaining design consistency and performance.
- Contributed to frontend architecture decisions with a focus on scalability, reusability, and long-term maintainability.

Technologies

Angular • React • TypeScript • Standalone Components • RxJS • SCSS • Git

Frontend Engineer

07/2023 – 07/2025

A Technologies

Key Achievements

- Led the design and development of reusable UI components adopted across multiple CRM modules.
- Built a reusable data table supporting sorting, pagination, drag-and-drop, and extensible configurations.
- Developed an advanced filtering framework enabling dynamic queries and flexible data exploration.
- Architected and implemented a real-time chat platform using SignalR.
- Integrated WhatsApp, Facebook, and Instagram messaging into a unified communication interface.
- Improved frontend maintainability by replacing legacy form solutions with a custom dynamic form framework.
- Collaborated closely with backend, QA, and product teams to deliver scalable enterprise features.

Technologies

Angular • TypeScript • RxJS • SignalR • PrimeNG • REST APIs

EDUCATION

Bachelor of Science in Petroleum and Mining Engineering

10/2016 – 07/2021

Suez University

Relevant coursework in mathematics, physics, geology, and engineering principles.

SKILLS

Frontend — Angular (17–20), React, TypeScript, JavaScript (ES6+), HTML5, SCSS, Tailwind CSS | **Architecture & UI** — Nx Monorepo, Storybook, Design Systems, Component Libraries, Standalone Components | **State Management** — RxJS, Signals, NgRx | **API & Communication** — REST APIs, SignalR, WebSockets | **Security** — JWT, OAuth, RBAC, Secure API Integration | **Tools** — Git, Azure DevOps, npm, Postman

LANGUAGES

English | Arabic

CERTIFICATES

Udacity: Professional Web Development Track

PROJECTS

QR Switch Portal

- Built from scratch
- Fintech
- Real-time transaction monitoring
- SignalR
- Encryption
- Authentication
- Dynamic permissions

ATM VAS Portal

- Built from scratch
- Modular architecture
- User management
- Role & permission management
- Reusable components

Shared UI Library

- Enterprise component library
- Standalone Angular components
- Shared across multiple applications
- Improved consistency and development speed
- Design patterns and documentation

Enterprise CRM Platform

Modeer360

- Developed modules for Contacts, Inventory, Deals, Campaigns, Chat, and Calls.
- Built reusable dashboards, tables, filtering systems, and data visualization components.
- Integrated real-time communication using SignalR.
- Worked with cross-functional teams to deliver enterprise business workflows.
